

Material Science Research Kits

Branch out from your current poly(3-hexylthiophene) research. Try different chain lengths of poly(3-alkylthiophenes) or some of our other functionalized 3-alkylthiophene polymers.

These polymer kits will allow you to survey small samples of several different polymers manufactured by Rieke Metals. Each kit contains 200mg of four to five different chain lengths of a polymer.

All kits are priced at \$390

#K1023

REGIOREGULAR POLY
(3-Alkylthiophene-2,5-diyl) Polymers

#K1027

FUNCTIONALIZED 3-ALKYLPOLYTHIOPHENE
with a Terminal Ester

#K1024

REGIORANDOM POLY
(3-Alkylthiophene-2,5-diyl) Polymers

#K1026

FUNCTIONALIZED 3-ALKYLPOLYTHIOPHENE
with a Terminal Acid

#K1025

WATER SOLUBLE POLYMERS
