2. Exposure Controls

<i>General protective and hygiene measures</i>	P280: Wear protective gloves/protective clothing/eye protection/face protection. The standard precautionary measures should be adhered to when handling Avoid contact with skin and eyes
--	--

<i>Engineering measures</i>	Ensure there is exhaust ventilation of the area. Use only in a chemical fume hood.
-----------------------------	---

<i>Eye / Face Protection</i>	Tightly fitting safety goggles. Faceshield (8-inch minimum). Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).
------------------------------	--

<i>Hand protection</i>	Handle with protective gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.
------------------------	--

<i>Respiratory protection</i>	P261: Avoid breathing dust/fume/gas/mist/vapours/spray. Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
-------------------------------	--

<i>Skin protection</i>	Protective clothing, antistatic. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
